Cost estimate for in-patient treatment in Klinikum Stuttgart

(valid for 2013)

Dear,

with the introduction of the new payment system with Diagnosis Related Groups, a cost calculation for the costs related to medical treatment and services is only possible to a limited degree. The following cost calculation is therefore only referring to the estimated costs for the expected medical treatment and services. It is based on the preliminary expected main diagnosis and the resulting treatment. Besides the patient's age the total costs may be influenced by comorbidities or any complications arising within the course of in-patient treatment.

A detailed specification of costs can be taken from the attached cost overview.

We kindly ask you to transfer the amount of **98.900,00 €** one week before hospitalisation into our bank account indicated below or to pay in cash, by EC-Card, Visa Card or MasterCard at the day of hospitalisation between 08:30 and 11:30 a.m.

Yours faithfully,

A. Ameziane
